Lobbyists.info releases the Factors of Influence Chart

Lobbyists.info is now offering a new resource in its free resources section, the Factors of Influence Chart. This new feature allows you to sort Lobbyists.info's comprehensive database on the federal lobbying industry by nine critical areas and serves as an easy way to rank 2,800 lobbying firms by the most influential criteria in the industry: employees, clients, issue areas, income and Congressional connections.

Visit the free resources section of Lobbyists.info to search for federal lobbying firms by number of lobbyists employed, number of clients, number of legislative issues, lobbying income and number of lobbyists who previously worked on Capitol Hill. This Hill "alumni" figure is further broken down to display the number of firm employees who at one time worked for a currently serving member of Congress.

For more information and to view the Factors of Influence Chart visit:
