US Congress Online added to Lobbyists.info

(Bethesda, Md.) Lobbyists.info has added a new component to its already expansive library of information.

US Congress Online features complete contact information, photos, maps, biographies and more for every member of Congress and Congressional staffer. The advanced feature includes an interactive map, segmented by congressional district, and enables users to search members by committee, name, or city/zip code. Staffers can be further filtered by areas of legislative responsibility.

Lobbyists.info has been the ultimate one-stop resource for information on government relations and lobbying information since 2006, the only daily updated comprehensive resource available for government relations professionals. It includes a compliance center, which provides information on the latest rules and regulations on lobbying ethics and procedure, in addition to the searchable databases.
